

## A night in the big Arena...

*At a small price!*

In the heart of the city of Verona lies the imposing roman amphitheatre, which was probably built in the first century. In ist class it is the third biggest amphitheatre of the world. Once there were thrilling shows of gladiators and wild animals, but what can you see today?

Today some of the most impressive events of the world take place in the Arena. Not everyone knows of the Operas but, once someone has seen an opera in the Arena, it is impossible to forget. The largest stage, used for a performance, the ca. 100 singers making up the choir, the movement, the blue sky, the stones carved thousands of years ago... *Everything combines to make your unique evening perfect!*
